

CUTICLE NIPPER

The blades on a cuticle nipper come in three sizes: quarter, half, and full jaw. Folks with small hands or that are novice manicurists may want to start off with the smallest, quarter jaw, cuticle nipper.

4mm / 0.16in / Size 12 / Quarter Jaw – Shortest of the common blade sizes

5mm / 0.2in / Size 14 / Half Jaw – Mid of the common blade sizes

6mm / 0.24in / Size 16 / Full Jaw – Longest of the common blade sizes

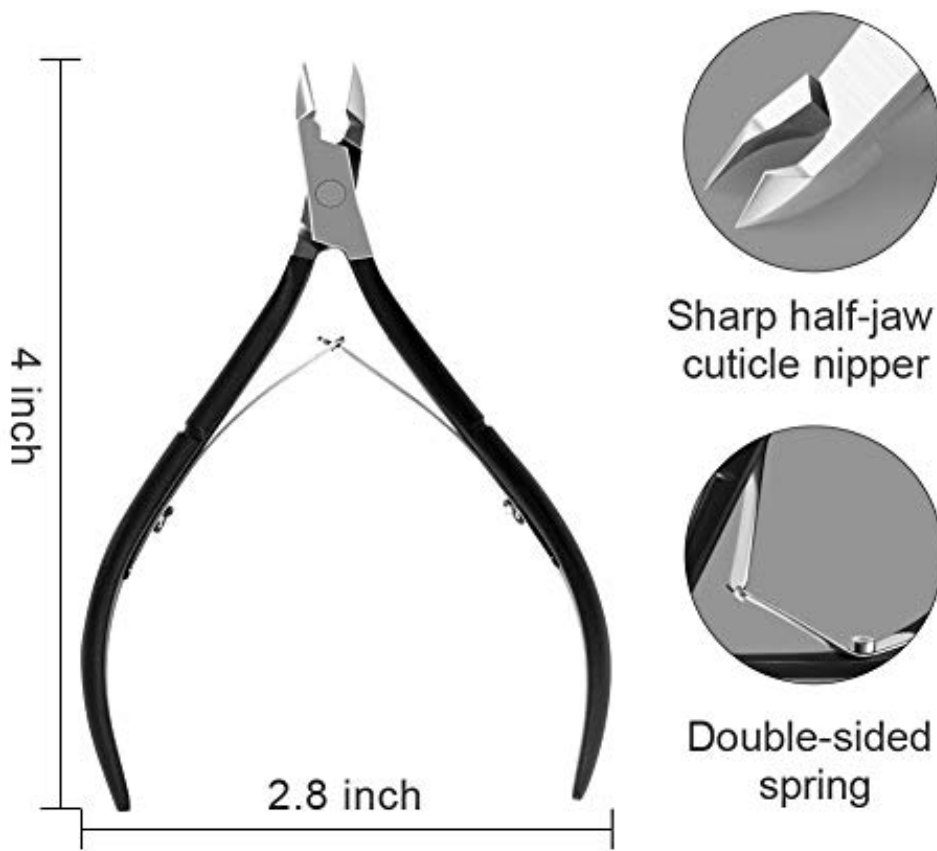

Choosing the right jaw size is generally about personal preference. We recommend that you experiment with the 5mm jaw to start. It is also the most popular length among users.

The smaller the jaw, the easier it is to reach and cut smaller slivers of cuticle, and the more control it offers. Experienced manicurists tend to favor the larger jaws because they get the job done more quickly.

If you already have a pair of cuticle nippers you like, but don't know what size it is, simply use a ruler to measure the cutting edges for your answer.

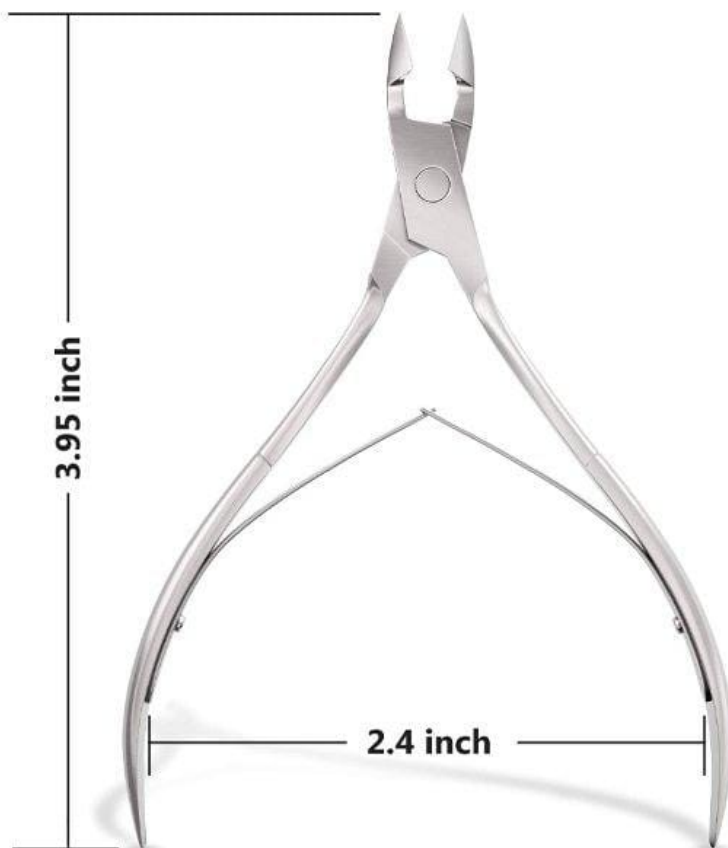

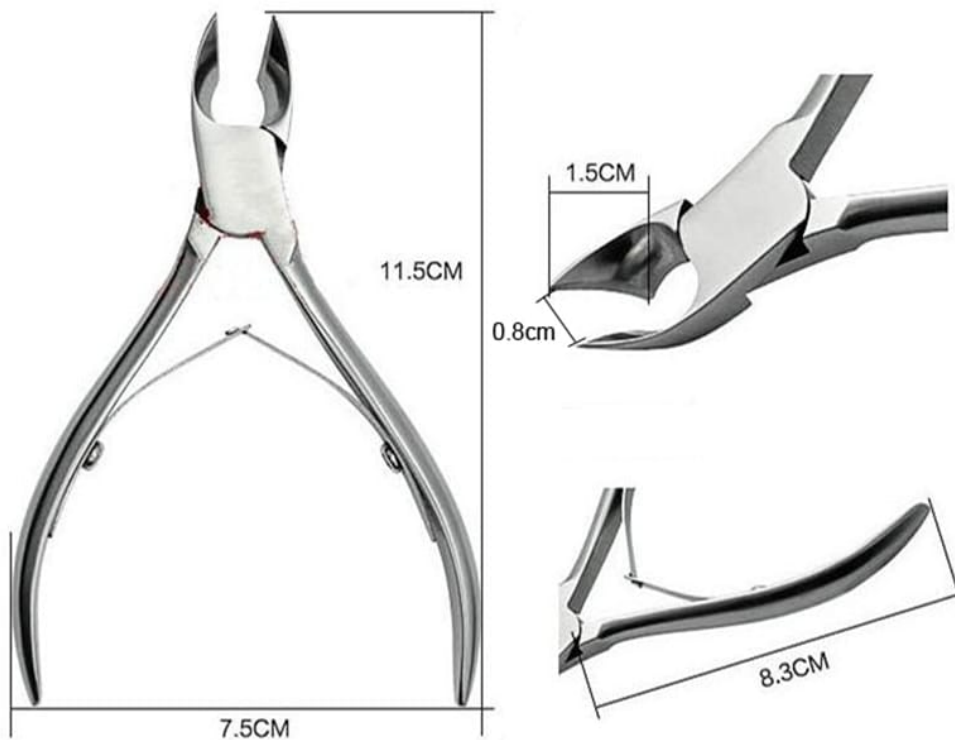

Durable Stainless Steel Cuticle Nipper

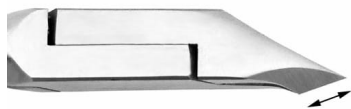

Item Size

Sharpening by hand produces the most precise cutting edges.
It also means that jaws can vary in length.

4mm / Quarter Jaw
0.16 - 0.2 inches

5mm / Half Jaw
0.2 - 0.24 inches

6mm / Full Jaw
0.24 - 0.28 inches

4.5 inch

Super-fine tip

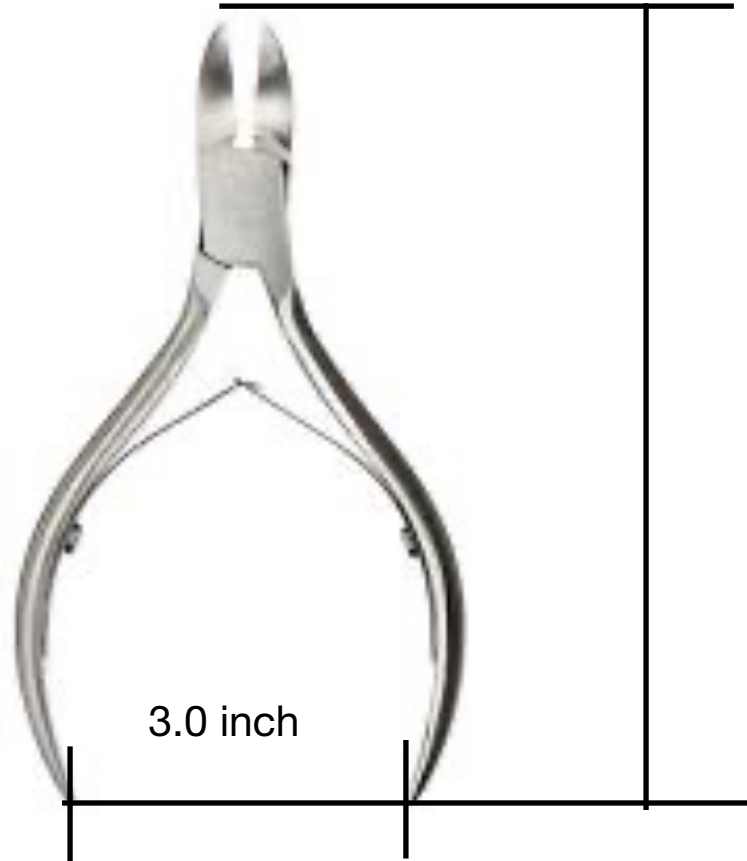

Ultra-sharp cutting edge

Double spring

CUTICLE SCISSORS

Pro Performance Scissors

EXTRAORDINARY EXPERIENCE

Cutting part without protrusion.
Unbeatable matching and fine
pivot surface sanding guarantee
smooth, seamless stroke.

DELICATE APPEARANCE

Curved shape and nickel plated
surface make this scissors quite
eye-catching. The shiny finishing
hence its high quality.

Sustainable Scissor Selection

SUPERIOR STEEL

Made of premium carbon stainless steel, our scissors stays sharp for decades and never rusts.

SHARP BLADES

Hand hammered blades, allows for perfect curve adjustment, ensuring flawless shearing.

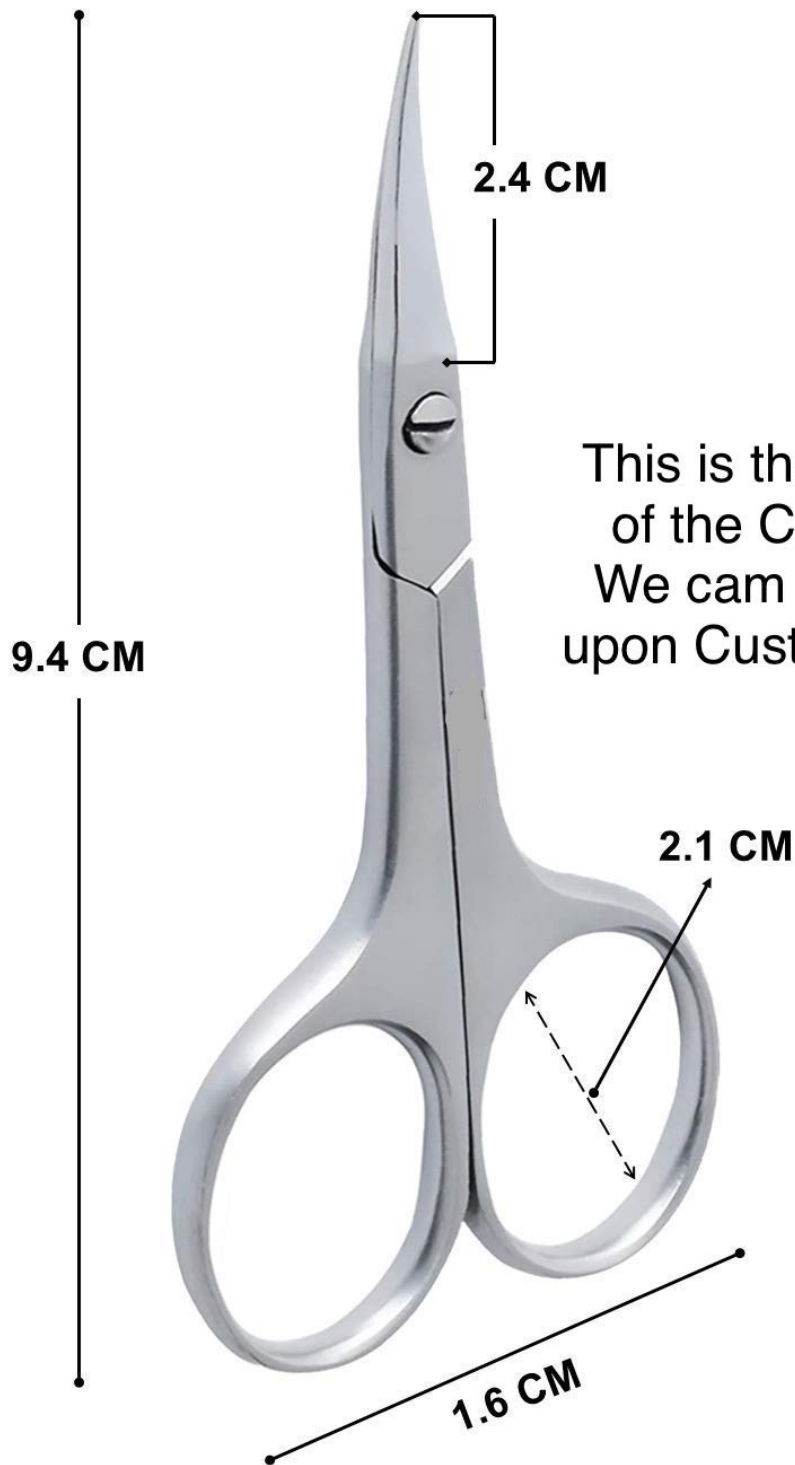

NEW JOINT

Innovative, beveled joint minimizes friction for easier cuts and reduced wear.

Product Dimensions

This is the common size of the Cuticle Scissor. We can make any size upon Customers demand.
